Welcome!

We are thrilled to be able to provide you with our first newsletter! In our newsletters we will be providing you with our specials, discounts and promotions, as well as computer related information that will allow you to be more knowledgeable and help you to understand and take care of your computer!

If you have any questions or would like to see anything specific in our newsletter please email us at customerservice@jesterscomputers.com

NEW ONE-ON-ONE CLASSES

We know that for most people learning new software or even how to use a computer can be frustrating. We also know that while handbooks and guides are helpful, hands on learning is usually the easiest way to learn. This is why we have started teaching One-On-One classes. The teacher Ayse Jester has been teaching people how to use computers for over 5 years. The classes are available in a one-on-one basis to ensure that every student is able to ask questions and receive the attention necessary. Prices are just \$35 for a one hour session on either Windows XP, or Windows Vista.

Some of the things taught in classes are (but not limited to):

- Basic Windows operations
- Word, Excel, PowerPoint, Publisher (2003 or 2007)
- QuickBooks
- Using the Internet

Please contact the Instructor by phone (717) 642-6611 or by email: customerservice@jesterscomputers.com for times & availability

Regular Maintenance

We strongly recommend an annual clean-up on all computers. Think of it as changing your cars oil, you can avoid doing it but the maintenance is what preserves the life of your car. This also gives us an opportunity to diagnose any problems before they cause damage to your system. This service is a flat rate service due to the varying speeds of computers. We will run several special utilities on your computer to rid it of any viruses, malware, and spyware. We will also shut off programs running in the background, optimize your system for performance, defragment your hard drive and clean the dust out of the computer.

Save your data-Before Its too late!

Many of our customers are under the impression that their hard drive will last forever. Unfortunately many of our customers have found out the hard way that this is not true. If you have pictures, documents, music or any kind of data on your computer that you do not want to loose it is NECESSARY to save a copy.

There are several ways that you can save your data. We recommend back-up drives as a permanent solution for those who wish to have an automated care-free backup system. You can also use any removable media. This includes: CD's, DVD's, flash drives, external hard drives, and floppy disks (though not recommended).

As shown on the right we recommend Maxtor back-up drives. The one pictured is a 320GB back-up drive that includes software. The software has an excellent backup solution that allows you to back-up what you want how often you want when you want.

**\$109 Includes
software installation
and setup!**

Looking for a new computer?

We know how important it is to have a high quality computer. No one wants to buy a computer and worry about how long it is going to last. This is why we deal with only the BEST.
